

Qarrar — Marketing Strategy

1. Positioning

For Arabic-speaking teams and decision-makers who are tired of opaque, untraceable decisions made in chat threads and spreadsheets,

Qarrar is the Arabic-first decision-intelligence platform

that turns any decision into a structured, weighted, and one-way-finalized record with a full audit trail.

Unlike spreadsheets and English-only tools, Qarrar is built RTL-native with governance-grade traceability and an AI advisor that suggests criteria and flags bias.

One-line pitch (Arabic):

قرار — منصة عربية لاتخاذ قرارات شفافة وقابلة للتدقيق.

One-line pitch (English):

Qarrar — where Arabic-speaking teams make decisions they can defend.

2. Target Personas

Primary: "The Overwhelmed Manager" (Tariq)

- 35–50, department head in a Saudi/UAE SMB (50–500 employees)
- Makes 5–15 significant decisions per quarter (hiring, vendor, project priority)
- Pain: decisions happen in WhatsApp/Slack, no record of *why*, hard to defend in board reviews
- Budget authority: can expense a \$20–50/month team tool without procurement approval

Secondary: "The Compliance Officer" (Noura)

- 30–45, GRC or HR-compliance role in a regulated industry
- Pain: needs an auditable trail of how hiring and vendor decisions were made
- Motivated by: finalize-lock, audit log, PDF rationale export
- Buys via: enterprise contract, championed by Tariq

Tertiary: "The Solo Consultant" (Amir)

- 28–40, independent strategy/HR consultant serving multiple clients
- Pain: needs a repeatable framework and branded export to look professional
- Buys: Pro tier, \$9–19/month

3. Brand Voice

- **Tone:** Confident, clear, professional — not playful. Decisions are serious.
- **Language:** Arabic-first. All marketing collateral ships in Arabic, with English as a secondary translation — never the other way around.
- **Visual identity:** Deep teal + warm sand neutrals (no purple), Arabic calligraphy-inspired logo mark, generous spacing for RTL readability.
- **Proof over promise:** Lead with case studies and before/after decision stories, not feature lists.

4. Channels

Channel	Priority	Why
LinkedIn (Arabic)	High	Where Tariq and Noura live; thought-leadership posts on decision frameworks
X / Twitter (Arabic tech)	Medium	Developer and startup-adjacent audience; good for launch buzz
YouTube (Arabic)	Medium	Long-form "how we decided" walkthroughs; evergreen SEO
Regional conferences (LEAP, Dubai GITEX)	High (Y2)	In-person credibility with enterprise buyers
Product Hunt	Low	English-dominant; useful for one-time launch signal, not sustained
WhatsApp/Telegram communities	Medium	Where Arabic tech/HR communities actually converse
SEO (Arabic long-tail)	High	Low competition for Arabic decision-framework queries

5. Content Strategy

Pillars

1. **Decision frameworks** — "How to structure a hiring decision in 6 criteria" (educational, SEO-anchored)
2. **Bias & governance** — "Why your last vendor pick was anchored to the first quote" (thought leadership)
3. **Customer stories** — "How [Company] cut hiring-decision time from 3 weeks to 4 days"
4. **Product deep-dives** — Short videos on finalize-lock, audit log, AI criteria suggestions

Cadence

- 2 LinkedIn posts/week (Arabic)
- 1 YouTube video/month

- 1 long-form blog post/month (bilingual, Arabic primary)
- 1 customer case study/quarter

Arabic SEO target keywords (examples)

- "أداة اتخاذ القرار" (decision-making tool)
- "مصفوفة القرار المرجح" (weighted decision matrix)
- "تدقيق القرارات الإدارية" (auditing management decisions)
- "كيف تختار أفضل موظف" (how to choose the best employee)

6. Launch Plan

Pre-launch (Weeks -4 to 0)

- Recruit 10 design partners from LinkedIn network
- Publish 3 foundational blog posts for SEO seeding
- Tease on Arabic tech Twitter/Telegram with short demo clips
- Build a waitlist page with early-access incentive (3 months free Team tier)

Launch week

- Coordinated LinkedIn posts from founders + design partners
- Product Hunt launch (secondary, English summary)
- Press outreach: Wamda, Magnitt, Arabia Tech newsletters
- YouTube launch video: "نحن ن صنع القرار بشكل خاطئ — وهذا الحل" (We make decisions wrong — here's the fix)

Post-launch (Months 1-6)

- Weekly customer-story spotlight
- Monthly webinar: "قرار الشهر" (Decision of the Month) — walk through a real decision in Qarrar
- Retargeting ads on LinkedIn (decision-making, HR, procurement audiences)

7. Acquisition Funnel

Awareness (LinkedIn / SEO / YouTube / word-of-mouth)

- Visit (Arabic-first landing page, social proof, demo video)
- Signup (free Pro trial, no credit card)
- Activation (create first decision within 24h)
 - Value moment (finalize first decision + export PDF)
 - Conversion (upgrade to Team for collaboration)
 - Expansion (invite teammates, hit seat count)
 - Retention (audit log becomes indispensable)

Activation target: 60% of signups create a decision in session 1.

Conversion target: 8% of activated free users convert to paid within 30 days.

Net revenue retention target: 115% (seat expansion within teams).

8. Pricing Levers in Marketing

- **Free tier as a wedge:** Solo use, 3 active decisions, full RTL — removes friction, builds habit.
- **Team tier as the money-maker:** Marketed via the "you can't defend a decision that lives in WhatsApp" angle.
- **Enterprise as the credibility marker:** Even if few buy it, having the tier signals seriousness.

Full pricing in `menu-and-pricing.md`.

9. Metrics & KPIs

Metric	Target (Y1 end)
Monthly signups	800
Free → Paid conversion	8%
Paid teams	200
Net revenue retention	115%
Organic traffic (Arabic)	5K visits/month
LinkedIn followers (company page)	5,000
CAC (blended)	< \$60
LTV/CAC	> 3.5

10. Budget Allocation (Year 1, \$60K marketing spend)

Category	%	Notes
Content production (Arabic)	30%	Writer, video editor, translation
Paid ads (LinkedIn retargeting)	25%	Retargeting only — no cold spend Y1
Events & design-partner program	20%	Sponsor 2 regional events, host design-partner dinners
Community & partnerships	15%	Telegram/WhatsApp community ops, HR-consultancy partnership
Tools & analytics	10%	CRM, analytics, SEO tools

11. Partnerships

- **HR & procurement consultancies** (regional) — embed Qarrar templates, revenue share

- **Arabic tech communities** (UAE Saudi Tech, Saudi Hackers) — sponsor meetups, offer free Team tiers to organizers
 - **Accelerators** (Flat6Labs, Misk) — portfolio companies get discounted Enterprise
